## Online Activities Focus!

At a time when technology is so accessible, it is important to ensure that our children are safe and informed.

In January, a report was published by the Children’s Commissioner entitled **Life in Likes**. It looks at the use of social media among 8-12 year olds.

The following are some of the key findings of the report and are printed here for your information, but also as topics that you can perhaps address together as a family. Starting a discussion together is one of the best ways of keeping your children safe, and ensuring that you are fully aware of their online presence and how they feel about it.

Positive effects of social media	Negative effects of social media
Making friends and creating things that other people like <i>Showing off one’s personality and sharing achievements</i> Giving and receiving ideas for doing new things and for planning the future <i>Keeping entertained</i> Communicating with distant family members <i>Getting help with homework</i>	<i>Worrying about what other people think</i> Not having anything good to boast about <i>Having to be on social media like everyone else</i> Seeing and receiving unpleasant comments <i>Not knowing how to handle ‘bad things’</i> Wondering whom one can trust online <i>Jealousy of what other people seem to have and look like</i> Worrying that they can’t control what is said on social media <i>Not liking their parents posting pictures of their children without their agreement.</i>

**Parental controls** are an important way to keep your child safe online.

Parental controls can be used to block upsetting or harmful content, control in-app purchases or manage how long your child spends online. And the good news is parental controls are really easy to set up.

Innocent searches sometimes reveal not so innocent results. So if you’re worried about what your child is searching for online, who they’re talking to or what they’re seeing, help is available.

It’s simple to get started. And, along with talking to your child regularly, using parental controls is one of the best ways to help keep children safe online. Call [0808 800 5002](tel:08088005002) to chat to expert NSPCC and O2 advisors.

## What are parental controls?

Parental controls are software and tools which you can install on phones or tablets, games consoles or laptops – and even your home broadband. You can also use them to help you block or filter the content your child sees when searching online. And family-friendly public WiFi can help when you’re out and about.

Parental controls are also available to help you to:

- plan what time of day your child can go online and how long for
- stop them from downloading apps they’re too young for
- manage the content different members of the family can see.

So whatever your child is doing online, there’s a way that you can help keep them safe.

*Thought for the Week*

*RESILIENCE: Never give up. Fall down seven times, get up eight.*

*Japanese Proverb*
